Cambridge Assessment
Dublin | Jun 2019

Excellent written and spoken
Portuguese - Brazilian native

Objective

I am currently seeking an internship or placement position to put my skills into practice and advance my career. I am enthusiastic to be part of a team to work on new applications and/or maintaining projects already in production.

Experience

05/2023 - today

Goods-in Support • Keeling's Logistics

Currently, I am trained as a goods-in operative, goods-in support and forklift operator. At the goods-in support role, I manage approximately 370 grid locations at the +1-degree environment and 10 goods-in bays, also, support the goods-in manager, and the goods-in assembly staff with system exceptions, assignment issues and any related problem that could interfere with the goods-in or assembly layouts workflow.

04/2021 – 04/2023

Goods-in Operative • Keelings's Logistics

Received and processed incoming shipments quickly and accurately, selected and prepared items to be assigned to assemblers to be picked into the correct products layouts. Assisted in the unloading of heavy items with the use of forklifts and pallet jacks.

02/2019 – 03/2021

Warehouse Operative • Assembler • Keeling's Logistics

Selected products to be distributed into the multiple stores, assuring correct quantity, quality, and safely using powered machines and pursuing good overall performance.

Key skills

C#, ASP, WPF, Windows Forms, .NET framework, SQL, MSSQL, NoSQL, MongoDB, GIT, HTML, CSS, JavaScript, Node.js, React.js, Next.js, Python and PHP, Wordpress.

Hobbies

Hiking, Traveling, Cooking, Magic The Gathering Arena, Swimming.

Projects

Fonsecar - Currently working on the third version of car shop web app using React.js, Next.js and Tailwind.css. The aim of this project is to practice my skill creating a fully responsive web page, and to explore the new version of Next.js 13.

Bank app – Coded in C# and WPF on the .Net framework as part of a class project. This app includes the fundamental functions needed to operate a bank, including cryptography, users and administrators transactions logs. Everything connected to a MSSQL database.

College Management System – in this class project, I coded an application that can be used to administer staff, students, classes and grades. C#.Net and Windows Forms on the .NET framework, MSSQL database was used in this assignment.

Interests

Web Development, .NET framework, JavaScript libraries, STEM, Drones, Data Science, AI.
